SAN FRANCISCO.

BRIDGEPORT, CONN.,

June, 1887.

THIS catalogue, being the most recent, is intended to supersede all others issued by The Union Metallic Cartridge Company.

The extensive reputation enjoyed by The U. M. C. Co. for the manufacture of reliable and accurate ammunition is due largely to a thorough knowledge of what is needed to suit the requirements of all fire-arms in general use, to the perfect machinery used in its production, and to the thorough system of inspection employed in the various stages of manufacture. Add to these important features the fact that the best materials only are used, and it is not difficult to understand that the result is a perfect ammunition recommended with one exception by all the leading fire-arm manufacturers of the United States.

The unquestionable superiority of the U. M. C. Ammunition for Repeating Arms can have no stronger endorsement than the fact that many man-

Manufacturers of Magazine Arms will only guarantee the shooting qualities of their rifles when U. M. C. Cartridges are used.

It would be out of place to here give a history of The U. M. C. Co., but we take this opportunity of reminding our many friends that the past quarter of a century has witnessed a phenomenal growth in its manufactory and business. It is now as conspicuous for its magnitude as it was twenty-five years ago for being the Pioneer of the Metallic Ammunition Manufacturing trade in the United States.
